About Me

Aspiring **Software Developer** specializing in **backend development, API design, and AI-driven applications**. Proficient in **Python, FastAPI, LangChain, and databases (MySQL, MongoDB, Firebase)**. Passionate about **web scraping, data processing, and large language models (LLMs)**. Seeking opportunities to apply technical expertise in building scalable IT solutions.

Technical Skills

- **Programming:** Python
 - **Frameworks & Libraries:** FastAPI, Django, Django REST Framework, Streamlit
 - **Databases & Storage:** MySQL, MongoDB, Firebase
 - **AI & LLMs:** OpenAI APIs, Gemini APIs, LangChain, Vertex AI
 - **Web & APIs:** HTML, CSS, REST APIs
 - **Data Processing & Automation:** BeautifulSoup, Pandas, Selenium
 - **Version Control & Deployment:** Git, GitHub, Azure, Render, Replit
 - **Developer Tools:** Cursor, Windsurf, Vapi.ai, VS Copilot, Postman, Docker (basic)
-

Experience

Software Developer | Slickbit Technologies | 2 Years

- Developed and optimized **REST APIs** using FastAPI & Django.
 - Automated **data extraction pipelines** with BeautifulSoup, Pandas & Selenium.
 - Integrated **LLM-powered features** (OpenAI, Gemini, LangChain) into applications.
 - Optimized **MySQL & MongoDB** performance for large-scale data handling.
 - Delivered **AI-driven projects** including clinical trial e-consent, shipment tracker, and metadata extractor.
-

Projects

1. Meta-Doc Automator

Automated system to extract metadata from **clinical trials & drug research documents** stored in SharePoint. The application processes documents, extracts metadata, and generates structured Excel reports saved back to SharePoint.

- **Key Features:** Automated retrieval, metadata extraction, Excel generation, SharePoint integration.
- **Technologies:** Python, FastAPI, Gemini LLM, React.js

2. Shipment Tracker

Smart monitoring application for **pharmaceutical shipments** that detects **temperature deviations** in containers. Sends **interactive Twilio calls** to logistics teams with real-time alerts and breach details, preventing spoilage.

- **Key Features:** Continuous monitoring, Twilio call alerts, anomaly reporting with Gemini LLM.
- **Technologies:** Python, FastAPI, React.js, Gemini LLM, Twilio

3. E-Consent Clinical Trial Participation

Secure platform enabling participants to complete **digital consent forms** for drug trials. Includes an **AI chatbot** to answer queries about trial duration, risks, and procedures. Generates a **unique participant ID** and provides an **admin dashboard** for approvals.

- **Key Features:** AI chatbot, e-consent form, unique ID generation, admin dashboard, Firebase SSO.
- **Technologies:** Python, FastAPI, Gemini LLM, Firebase, React.js

Education

B.Tech in Electronics & Communication Engineering

University College of Engineering and Technology, MGU, Nalgonda

Year of Passing: 2023 | Percentage: 69%
